

NOTICE INVITING WRITTEN PUBLIC COMMENTS

NOTICE is hereby given that the Air Pollution Control Officer of the Bay Area Air Quality Management District ("District") has made a preliminary decision to issue a Synthetic Minor Operating Permit to Facility A0167, Maxwell House Division of Kraft Foods, located at 100 Halcyon Drive, San Leandro, as requested under application #23324. This facility operates six large coffee roasters, coffee handling equipment, an emergency standby diesel generator, and a small natural gas fired boiler.

The proposed permit will impose practically-enforceable permit conditions that limit the facility's potential to emit to 95 tons per year of carbon monoxide, 9 tons of any single hazardous air pollutant, and 23 tons/year of aggregate hazardous air pollutants. By limiting the facility's potential to emit, the proposed permit will ensure that the facility remains exempt from the requirements of the Federal Operating Permit Program as codified in Title V of the Federal Clean Air Act Amendments of 1990 and implemented by the District through Regulation 2, Rule 6.

The Air Pollution Control Officer invites written public comment on the above application and intended action within 30 days from the date of this publication.

The evaluation report with synthetic minor operating permit conditions and supporting materials are available on the District's website at: <http://www.baaqmd.gov/Divisions/Engineering/Public-Notices-on-Permits.aspx>. The documents are also available for public inspection at the District Headquarters, 939 Ellis Street, San Francisco, CA 94109, in the Engineering Division on the 3rd floor. Written comments should be mailed to Brian Lusher at the BAAQMD, 939 Ellis Street, San Francisco CA 94109 or by e-mail to blusher@baaqmd.gov.

Dated at San Francisco, the 12th day of September, 2012.

**Jack P. Broadbent
Executive Officer/Air Pollution Control Officer
Bay Area Air Quality Management District**
