

BAY AREA
AIR QUALITY
MANAGEMENT
DISTRICT

PUBLIC NOTICE

April 9, 2012

TO: Parents or guardians of children enrolled at the following schools:

Bellarmino College Preparatory School

All residential and business neighbors located within 1,000 feet of the proposed new or modified source of air pollution listed below.

FROM: Bay Area Air Quality Management District

RE: Permit Application #24074 for the following source of air pollution:

**Soil Vapor Extraction System
Daniel F. Williams Co., Inc.
560 Emory Street, San Jose, CA 95110**

The Bay Area Air Quality Management District (the “District”) is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source.

You are receiving this Public Notice because a permit application has been filed with the District for the above referenced source of air pollution. A description of the proposed project follows:

To remedy an existing contamination problem, a Soil Vapor Extraction and Treatment System has been proposed for the Daniel F. Williams Co., Inc. Storage and spillage of solvents formerly used at the site contaminated underlying soil and groundwater. Daniel F. Williams Co., Inc. has proposed a system consisting of a vacuum blower to extract solvent vapors from wells drilled at the site. Treatment of the extracted vapor will be accomplished by Carbon adsorption.

The District has determined that the increase in health risks resulting from toxic air contaminant emissions from the proposed source are within acceptable levels, and that the project will comply with all other applicable air pollution control requirements. Accordingly, the District plans to issue a Permit to Operate for the proposed project.

If you are interested in getting more information on the District's evaluation of this proposed project, you may request copies of the applicable staff report by calling the District at the telephone number listed at the end of this notice. This information also can be viewed or downloaded from the District website at:
