

BAY AREA
AIR QUALITY
MANAGEMENT
DISTRICT

PUBLIC NOTICE

February 10, 2014

TO: Parents or guardians of children enrolled at the following school(s):

**Helios New School
Kehillah Jewish High School**

All residential and business neighbors located within 1,000 feet of the proposed new or modified source(s) of air pollution listed below.

FROM: Bay Area Air Quality Management District

RE: Permit Applications #25539, #25574, and #25789 for the following source(s) of air pollution:

One Emergency Standby Generator- Diesel Engine (under Application #25539)

One Photoresist Coater with Electric Oven (under Application #25574)

One Emergency Standby Generator- Diesel Engine (under Application #25789)

**Space Systems/Loral
3825 Fabian Way
Palo Alto, CA 94303**

The Bay Area Air Quality Management District (the “District”) is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source(s) of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source(s).

You are receiving this Public Notice because a permit application has been filed with the District for the above referenced source(s) of air pollution. A description of the proposed project follows:

Space Systems/Loral has applied for an Authority to Construct and/or Permit to Operate two Emergency Standby Generator-Diesel Engines and a photoresist coater with an electric oven. Each engine will be used to generate

power during emergency conditions only. Each emergency engine will be periodically tested to ensure that it will generate electricity when needed. Testing may not be conducted between 7:30 a.m. and 3:30 p.m. on days when school is in session, including any school sponsored activity. The photoresist coater and electric oven will be used to produce small-scale features on precision satellite components.

PRELIMINARY EVALUATION

The District has evaluated the permit application for the proposed project and has made a determination that the project is expected to comply with all applicable District, state, and federal air quality-related regulations, including the health risks resulting from toxic air contaminant emissions. The preliminary recommendation is to issue a permit for this project. After considering all comments received, the District will make a final determination.

ADDITIONAL INFORMATION

If you are interested in getting more information, you may request copies of the District's evaluation reports by calling the District at the telephone number listed at the end of this notice. This information is also accessible on the District website at:
