AIR QUALITY
MANAGEMENT
DISTRICT

PUBLIC NOTICE

February 19, 2014

TO: Parents or guardians of children enrolled at the following school(s):

Boynton High School

The Harker School

Lynhaven Elementary School

All residential and business neighbors located within 1,000 feet of the proposed new or modified source(s) of air pollution listed below.

FROM: Bay Area Air Quality Management District

RE: Permit Application #25799 for the following source of air pollution:

One Emergency Standby Diesel Generator Set

AT&T Mobility

878 Boynton Ave.

San Jose, CA 94117

The Bay Area Air Quality Management District (the “District”) is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source(s) of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source(s).

You are receiving this Public Notice because a permit application has been filed with the District for the above referenced source of air pollution. A description of the proposed project follows:

AT&T Mobility has applied for an Authority to Construct and/or Permit to Operate a Stationary Emergency Diesel Engine Powered Generator at 878 Boynton Ave, San Jose, CA 95117. It will be used to generate power during emergency conditions only. The emergency engine will be periodically tested to ensure that it will generate electricity when needed. Testing is not allowed to occur between 7:30 am and 3:30 pm on days when school is in session including times when any school sponsored activities are scheduled.

PRELIMINARY EVALUATION

The District has evaluated the permit application for the proposed project and determined that the project will comply with all applicable District, state, and federal air quality-related regulations, including the health risks resulting from toxic air contaminant emissions. The preliminary recommendation is to issue a permit for this project. A final determination will be made after considering all comments are received.

ADDITIONAL INFORMATION

If you are interested in getting more information, you may request copies of the the District's evaluation report by calling the District at the telephone number listed at the end of this notice. This information is also accessible on the District website at:
