

BAY AREA
AIR QUALITY
MANAGEMENT
DISTRICT

PUBLIC NOTICE

April 18, 2014

TO: Parents or guardians of children enrolled at the following school(s):

St. Charles Borromeo School

Marshall Elementary

All residential and business neighbors located within 1,000 feet of the proposed new or modified source(s) of air pollution listed below.

FROM: Bay Area Air Quality Management District

RE: Permit Application #25949 for the following source(s) of air pollution:

Soil Vapor Extraction Operation

Frey Environmental, Inc.

599 South VanNess Avenue, San Francisco, CA 94110

The Bay Area Air Quality Management District (the “District”) is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source(s) of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source(s).

You are receiving this Public Notice because a permit application has been filed with the District for the above referenced source(s) of air pollution. A description of the proposed project follows:

Frey Environmental, Inc. has applied for an Authority to Construct and Permit to Operate a Soil Vapor Extraction Operation to remedy an existing contamination problem. Petroleum products were found to be present in the soil. A vacuum blower will extract petroleum vapor and emissions will be captured by a Carbon Adsorption Unit. Emissions from the proposed operation are expected to be significantly controlled, and the operation will be of limited duration.

PRELIMINARY EVALUATION

The District has evaluated the permit application for the proposed project and has made a determination that the project is expected to comply with all applicable District, state, and federal air quality-related regulations, including the health risks resulting from toxic air contaminant emissions. The preliminary recommendation is to issue a permit for this project. After considering all comments received, the District will make a final determination.

ADDITIONAL INFORMATION

If you are interested in getting more information, you may request copies of the the District's evaluation report by calling the District at the telephone number listed at the end of this notice. This information also accessible on the District website at:
