

BAY AREA
AIR QUALITY
MANAGEMENT
DISTRICT

PUBLIC NOTICE

May 18, 2016

TO: Parents or guardians of students enrolled at the following school(s):

**Marshall Elementary School
Saint Charles School**

All residential and business neighbors located within 1,000 feet of the proposed new or modified source(s) of air pollution listed below.

FROM: Bay Area Air Quality Management District

RE: Permit Application #27520 for the following source(s) of air pollution:

Soil Vapor Extraction System, abated by Electric Catalytic Oxidizer

**Pangea Environmental Services, Inc
505 So Van Ness Avenue
San Francisco, CA 94110**

The Bay Area Air Quality Management District (the “District”) is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source(s) of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source(s).

You are receiving this Public Notice because a permit application has been filed with the District for the above referenced source(s) of air pollution. A description of the proposed project follows:

Pangea Environmental Services, Inc has applied for an Authority to Construct and/or Permit to Operate for a soil vapor extraction operation. The purpose of this project is to remediate residual concentrations of petroleum hydrocarbons in the gasoline range, and benzene, toluene, ethylbenzene, and xylene (BTEX) compounds in the site subsurface and

groundwater. The site is an operating gasoline service station located in a mixed commercial/residential area.

PRELIMINARY EVALUATION

The District has evaluated the permit application for the proposed project and has made a determination that the project is expected to comply with all applicable District, state, and federal air quality-related regulations, including the health risks resulting from toxic air contaminant emissions. The preliminary recommendation is to issue a permit for this project. After considering all comments received, the District will make a final determination.

ADDITIONAL INFORMATION

If you are interested in getting more information, you may request copies of the District's evaluation report by calling the District at the telephone number listed at the end of this notice. This information also accessible on the District website at:
