

BAY AREA
AIR QUALITY
MANAGEMENT
DISTRICT

PUBLIC NOTICE

September 30, 2016

TO: Parents or guardians of children enrolled at the following school(s):

**Saint Leo The Great School
Piedmont Avenue Elementary School
Pacific Boychoir Academy**

All residential and business neighbors located within 1,000 feet of the proposed new or modified source(s) of air pollution listed below.

FROM: Bay Area Air Quality Management District

RE: Permit Application #27828 for the following source(s) of air pollution:

**Sub-slab Depressurization Vapor Extraction System, abated by A-1 and A-2
A-1: Compressed Air Heat Exchanger
A-2: (2)-200 Pound Activated Carbon Vessels
West Environmental Services & Technology
For
Former Mee Rae/Maillette/Payless Cleaners
4212-4220 Piedmont Avenue
Oakland, CA 94611**

The Bay Area Air Quality Management District (the "District") is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source(s) of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source(s).

You are receiving this Public Notice because a permit application has been filed with the District for the above referenced source(s) of air pollution. A description of the proposed project follows:

West Environmental has applied for an Authority to Construct and/or Permit to Operate a Sub-Slab Depressurization Vapor Extraction System that will be used to remove perchloroethylene, trichloroethylene and other trace Toxic
[375 Beale Street, Suite 600 • San Francisco 94105 • 415.749.5000 • www.baaqmd.gov](http://www.baaqmd.gov)

Air Contaminants from the contaminated soil located at 4212-4220 Piedmont Avenue, Oakland, CA 94611. The emissions from the source are abated by two 200-pound carbon vessels in series.

PRELIMINARY EVALUATION

The District has evaluated the permit application for the proposed project and has made a preliminary determination that the project is expected to comply with all applicable District, state, and federal air quality-related regulations, including the health risks resulting from toxic air contaminant emissions. The preliminary recommendation is to issue a permit for this project. After considering all comments received, the District will make a final determination.

ADDITIONAL INFORMATION

If you are interested in getting more information, you may request copies of the District's evaluation report by calling the District at the telephone number listed at the end of this notice. This information is also accessible on the District website at:
