RE: Permit Application #418119 for the following source(s) of air pollution:

**Gasoline Dispensing Facility**

**All Star Gas**

**3820 San Leandro St**

**Oakland, CA 94601**

---

The Bay Area Air Quality Management District (the “District”) is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source(s) of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source(s).

You are receiving this Public Notice because a permit application has been filed with the District for the above referenced source(s) of air pollution. A description of the proposed project follows:

*Construction and operation of a gasoline dispensing facility at 3820 San Leandro St. Oakland, CA 94601*

***PRELIMINARY EVALUATION***

The District has evaluated the permit application for the proposed project and has made a preliminary determination that the project is expected to comply with all applicable District, state, and federal air quality-related regulations, including the health risks resulting from toxic air contaminant emissions. The preliminary recommendation is to issue a permit for this project. After considering all comments received, the District will make a final determination.

***ADDITIONAL INFORMATION***

If you are interested in getting more information, you may request copies of the District's evaluation report by calling the District at the telephone number listed at the end of this notice. This information is also accessible on the District website at:
