Ms. Deborah Jordan  
Director, Air Division  
**United States Environmental Protection Agency, Region IX**  
75 Hawthorne Street  
San Francisco, CA 94105

Dear Ms. Jordan:

This is to advise you that the Bay Area Air Quality Management District is issuing a minor revision and an administrative amendment to the Major Facility Review Permit for the following facility.

Facility	Facility Name	Application	Permit Engineer	City	County
A0010	Chevron Products Company	17429 et al.*	G. Solomon	Richmond	Contra Costa

\*includes applications 6898, 8451, 14676, 15712, 15822, 15915, 16393, 16591, 16643, 17027, 17176, 17282, and 17452

The purpose of this action is to revise the Title V permit to reflect changes made under several NSR applications.

The EPA 45-day review period ended on January 2, 2009. No comments on the proposed minor revision were received from EPA or ARB. The facility identified some typos, errors, and omissions and the district permit engineer identified an error in a permit condition. The following is a list of administrative changes that have been made to the permit to correct those typos, errors, and omissions:

- In Table II-B, the model numbers for A-620, A-627 and A-628 were corrected. Also, A-7537 was added to Table II-B since it was inadvertently left off the equipment list.
- Table IV Abatement was corrected to reflect the changes made to permit condition #8869.
- In Tables IV.F1.0 and VII.F1.0 a typo was corrected to include S-4364.
- In Section VI, condition #23735 was added since it was inadvertently left out and condition #24085 was edited for clarity. Also, condition #469 was updated to reflect the current emissions limits.
- Table VII.G.1.4 was corrected to be consistent with condition #24085.
- Table VII.H.2.1 was changed to remove both an archived abatement device (A-414) and an archived condition #22003.
