Re: **ConocoPhillips – San Francisco Refinery - Facility #A0016**
Minor Revisions and Administrative Amendment to Major Facility Review Permit

Dear Ms. Jordan:

ALAMEDA COUNTY
Roberta Cooper
Scott Haggerty
Nate Miley
Shelia Young

This is to advise you that the Bay Area Air Quality Management District is proposing minor revisions and an administrative amendment to the Major Facility Review Permit for ConocoPhillips – San Francisco Refinery (Facility Number A0016).

CONTRA COSTA COUNTY
Mark DeSaulnier
Erling Horn
Mark Ross
(Secretary)
Gayle B. Uilkema
(Vice-Chairperson)

The purpose of this application is to incorporate revisions from the following applications:

Revisions are proposed to the following parts of the permit:

MARIN COUNTY
Harold C. Brown, Jr.

NAPA COUNTY
Brad Wagenknecht

SAN FRANCISCO COUNTY
Chris Daly
Jake McGoldrick
Gavin Newsom

SAN MATEO COUNTY
Jerry Hill
Marland Townsend
(Chairperson)

SANTA CLARA COUNTY
Erin Garner
Liz Kniss
Patrick Kwok
Julia Miller

SOLANO COUNTY
John F. Silva

SONOMA COUNTY
Tim Smith
Pamela Torliatt

Application	Revision
9060	This application resulted in an Authority to Construct to physically modify the S-307 uncracker unit and the S-308 reformer unit to allow an increase in production rate. As a result, an increase in annual throughput has been permitted at S-308, and increases in both daily capacity and annual throughput have been permitted at S-307.
9498	This application resulted in a permitted increase in the hourly sludge capacity of S-386 and the associated annual throughput limit for this source. These increases are considered to be corrections to the values currently in the Major Facility Permit.
10116	This application resulted in a decision to allow 11 combustion devices that are normally controlled by SCR and equipped with NOx CEMS to operate without SCR abatement during maintenance activities as long as the CEMs are in service and no emission limits are violated.
10332	This application resulted in an Authority to Construct to increase the processing capacity of the S-305 naphtha hydrotreater by optimizing unit relief valve settings and by replacing some of these valves. As a result, increases in daily capacity and annual throughput have been permitted at S-305.
10872	This application resulted in a change to Condition 1694 to specify how to implement the calculation procedures of Regulation 9, Rule 10 for combustion devices subject to this rule. Because these rule provisions are not included in the SIP, this is an administrative amendment to the Major Facility Permit.

Jack P. Broadbent
EXECUTIVE OFFICER/APCO

Tables II-A, VII-G and VII-N, and Permit Conditions 1694, 12122 and 20989

A Statement of Basis, including the revised parts of the permit and the permit evaluations for each application, is enclosed.

If you have any questions on this matter, please call **Steve Hill, Air Quality Engineering Manager, at (415) 749-4673.**

Very truly yours,

Signed by Jack P. Broadbent
