Dear Ms. Jordan:

This is to advise you that the Bay Area Air Quality Management District is proposing a minor revision to the Major Facility Review Permit for Lehigh Southwest Cement Company and is submitting the permit to EPA for review.

The purpose of this minor revision is to include the operation of two synthetic gypsum feeders (S-223 and S-246). Both synthetic gypsum feeders were installed in 1994, but were not placed in synthetic gypsum service until March of 2010. Lehigh obtained a Permit to Operate for S-223 and S-246 in August 2011 under New Source Review (NSR) application # 23594. The synthetic gypsum is used to partially replace the permitted natural gypsum that Lehigh blends with clinker to produce cement.

**MARIN COUNTY**  
Harold C. Brown, Jr.

This revision is minor pursuant to BAAQMD Regulation 2-6-215 and will be effective immediately. The permit will be formally issued after the completion of the EPA 45-day review period. This revision is not subject to public comment and therefore, requires no public notice.
