

Dear Ms. Bui and others,

The trucks for the facility moving back and forth on the Steven Caynon Road carry materials for cement cause huge pollution everyday because the smoke from the truck exhaustion and the dust from the truck loads. The huge truck movement is so frequent everyday making the air quality unbearable for the residents around the Steven Caynon Road. We can never open the windows or being outside during the weekdays. If any of you are here during the weekdays, you can see and feel it.

We really need to have the facility move away from this residential area to solve this problem.

I am adding a couple of my neighbors on the Cc list hoping they would offer more valuable comments.

Thank you in advance.

John Chen
