Subject: Proposed Renewal Title V Permit for Lehigh Southwest

Mr. Bui:

Thank you for notification and solicitation of comments for the Proposed Renewal Title V Permit for Lehigh Southwest Cement Company.

The language in the Title V Permit and Statement of Basis via the website is largely beyond my realm of comprehension, but I would like to offer the following comments:

On Page 5; I. Standard Conditions; F. Monitoring Reports: Rather than every 6 months, these reports should be submitted every other month.

Is there a time limit that corrective or preventative is to be implemented?

Although I realize it is not possible to curtail the volume and frequency of truck traffic on Foothill Blvd., I would like to bring to your attention the inconvenience and frustration caused by slow moving, exhaust emitting trucks on this major, community thoroughfare at times when we must take our children to school and go work in the morning.

Thank you,

Patricia L. Rod
