Subject: Lehigh Southwest Cement Company

Hello,

I am writing to express my support that the mercury emissions from the Lehigh Southwest Cement Company be reduced per the EPA proposal. Mercury is a very dangerous poison, and the plant should be doing everything possible to reduce the amount of mercury with which it pollutes the Los Altos/Cupertino area. My three small children attend school in Los Altos not far from the plant, and I believe their emissions to be a factor in my daughter's asthma. I would be happiest if the Title V permit were NOT renewed.

Thank you,

Jennifer Schmid
