Subject: cement factory in Stevens Creek Blvd., Cupertinto

Dear Mr. Bui:

I am writing this letter to object the continuing operation of the cement factory in Stevens Creek Blvd., Cupertinto, CA. I am one of the residents living in this area which is a densely populated quite residential area and the Stevens Creek Elementary School is near by and so do the Linclon elementary school and Monta Vista High School.

The cement trucks hauling the cement materials have caused terrible air pollution, dusts, traffic congestion and noise. Such a strong pollution to the air quality can have detrimental adverse effect to the health of the residents in the area and students in the schools mentioned above. In fact, between this cement factory and the quarry in the area, the air quality has got so bad that I have not been able to open my windows at all. This is very unfair to the residents and students.

As many other residents would tell you, I would strongly recommend such a factory be moved to a more appropriate area with much less dense population.

Thank you for your considerations

John Chen
