Ms. Thu,

I will like to request that only Stevens Creek Elementary school should not be the only location for air quality monitoring. It should include other locations in Cupertino on the southern sites (Kennedy, Monta Vista area) due to wind directions.

I feel this plant is a health hazard to our children, wild life and communities and should not be allowed to operate. Cement plants are the biggest polluters and in this era when California is trying to lead the green initiatives this is big blot on the health of the bay area residents and california in general. My humble request to you is to stop this pollution asap.

Thanks,

Dipti Razdan
