

Public Comment – Lehigh Cement Plant
From: Eva Cash Cooly
Friday, October 23, 2009

She and her husband, Fred, are citizens of Cupertino, and are very concerned with the Lehigh Cement Plant getting its permit renewal when it is poisoning the air for all people in the community. They attended the meeting and there are six people she is representing. She wants it taken seriously; it should be shut down even though it has been there a long time. It is off-shore so it does not pay any property or income taxes, many doctors have testified at the meeting saying it is poisoning people from Los Altos to Las Gatos. 408 446-0304.
