My name is John Schroeder, I'm a resident near 85 and 280, calling about the Lehigh cement plant. I don't share all of my neighbors concerns about the plant. I think it is okay to give it a permit and keep it in operation, but I am concerned about the Chromium 6 issue. I understand that the State is considering changing the standards for Chromium 6, and if that is the case, I think it would be prudent to issue a temporary permit or something and see what those standards are before giving the plant a full scope permit.

But again, as I said before, I don't share all of my neighbor's concerns; I think businesses have a right to operate as long as they're safe for the neighbors. You can reach me if you have any questions at 408-739-8873.

My name is Ray Darwosey. I'm a Cupertino resident. I'm calling regarding the Lehigh Cement Factory. We have a lot of concerns and none of them addressed. Some of them have to do with the fact that I've been living in Cupertino which is only ½ mile away from the cement plant. For the last 12 years, my wife has had two abortions. My daughter established asthma, and just, things are definitely need to be....you know research and study needs to be done on the cement factory. If you come to our house, look at our garden and cars. We see a lot of dust on a daily basis. It's amazing that this has been allowed to happen. So, this is my concern. Please help us dealing with this. Thank you. My number is 408-802-6264. My email is rajaid@yahoo.com. Definitely, the permit has to be suspended and not be renewed, and to look at more answers.
