The purpose of this amendment is to add non-federally enforceable permit condition 19758, parts 1 through 6 to the permit for S-32 and S-33 diesel engines to ensure compliance with the stationary diesel engine air toxics control measure. The compliance schedule under Section V of the permit has been removed since S-32 and S-33 are now in compliance with the air toxics control measure. Obsolete condition 19758, part 1 that required recordkeeping of the fuel sulfur content certified by the fuel vendor has been removed because the facility can only purchase ARB ultra-low sulfur diesel fuel that meets a 15 ppm total sulfur content specification. References to Regulation 9, Rule 8, the ATCM, and revised condition 19758 were updated as necessary throughout the permit.

Administrative amendments do not require EPA review and are effective upon issuance.

The final permit can be viewed on the BAAQMD website at http://www.baaqmd.gov/pmt/title_v/public_notices.htm. We will also send the documents to you via the Electronic Permit Submittal System. If you have any questions regarding this project, please call Dennis T. Jang, Senior Air Quality Engineer, at (415) 749-4707.

Sincerely yours,

Signed by Jim Karas, P.E.
