Re: Cancellation of Title V permit for Pacific Gas & Electric, Hunters Point Power Plant, Facility A0024

Dear Ms. Jordan:

This purpose of this letter is to notify you that the District has cancelled the Title V permit for the facility above.

This facility was issued a Title V permit on November 8, 1999 because it was a major source of regulated air pollutants. On May 17, 2006, PG&E sent a letter to the District asking for cancellation of all District permits except for the following 8 minor sources:

Remaining Sources

S-16 No. 9 Jet Fuel Tank
S-17 Jet Fuel Loading/Unloading Facility
S-19 Oil-Water Separator
S-26 No.1 Lubricating Oil Storage Tank (No. 4 Unit) [Exempt]
S-27 No.2 Lubricating Oil Storage Tank (No. 4 Unit) [Exempt]
S-30 Maintenance Coating Operation
S-31 Maintenance Wipe Cleaning
S-32100 Fugitive and Miscellaneous Emissions [Exempt]

The letter also requested cancellation of the Title V permit because the potential to emit has dropped below the Major Source thresholds. The letter is attached.

Since the facility's potential to emit is now below the Major Source thresholds, the District is canceling the existing Title V Permit.

The cancellation is effective as of the date of this letter.

The District will also notify the California Air Resources Board and the facility in writing that the permit has been cancelled.

If you have any questions regarding this matter, please call Dennis Jang, Senior Air Quality Engineer, at (415) 749-4707.

Sincerely yours,

Jack P. Broadbent
Executive Officer/APCO
