**NOTICE INVITING WRITTEN PUBLIC COMMENTS**

**NOTICE** is hereby given that the Bay Area Air Quality Management District is reopening the Major Facility Review Permit for the following Facility:

<b>Application</b>	<b>Facility#</b>	<b>Facility Name</b>	<b>Address, City</b>	<b>Type of Operation</b>
8895	A0031	Dow Chemical	901 Loveridge Road Pittsburg, CA 94565	Chemical Manufacturing

The purpose of the reopening is to replace the permit conditions that were removed due to confidential information claims with permit conditions that can be disclosed to the public and to remove the Custom Schedule of Compliance, because the terms of that compliance schedule have been met.

The reopening will result in no change in emissions.

The District invites comments on these permit condition changes. The District also invites comments on changes made to the draft permit published on October 14, 2003, as reflected in the final permit issued on December 1, 2003. Comments made on other aspects of the permit will not be addressed at this time. All comments must be received by June 30, 2004. The public may also request a public hearing for the reopening of the permit. Any request for a hearing should state the reason for the request.

The reopening of the Major Facility Review Permits is also subject to review and approval by US EPA. If US EPA has not objected to the proposed permit and District has not addressed a public comment in a satisfactory manner, the public may petition US EPA, Region IX, Operating Permits Section at 75 Hawthorne Street, San Francisco, CA 94105, within 60 days after the end of US EPA's review, to reconsider the decision to not object to the permit. The beginning and end of EPA's review period can be found on EPA Region IX's website at:  
<http://www.epa.gov/region09/air/permit/index.html>.
