Attachment 2

Other changes:

A citation of Condition 21422, part 8, omitted in error, has been added to Table IV-A. This condition does appear in Section 6 and Section VII.

The title of the citation of 40 CFR 60.5105 in Table IV-B has been changed from "Inform the administrator if the increment is not met" to "What if I do not meet an increment of progress?" This is the title as it appears in the Code of Federal Regulations

The citation of the Monitoring Requirement Citation (column 6) in Table VII-A for the Emission Limit Citation (column 2) for the sulfur content limit in Condition 21422, part 6, has been corrected from Condition 21422, part 9b to Condition 21422, part 7.

A number of conditions have been designated as non-federally enforceable in Section IV, Applicable Requirements. Asterisks are used to flag non-federally enforceable conditions in Section VI, Permit Conditions. Missing asterisks have been added to several non-federally enforceable conditions in Section VI. This correction is the correction of typographical errors and is considered to be an administrative amendment.
