BAY AREA AIR QUALITY  
MANAGEMENT DISTRICT

**SUBJECT: SEMI-ANNUAL MONITORING REPORT 2012 - MAJOR FACILITY REVIEW  
PERMIT - FACILITY 1403**

This report is intended to fulfill the semi annual monitoring requirements of the Major Facility Review Permit (MFRP) issued to the above referenced facility.

Emissions from three digester/natural gas fueled internal combustion engines; S-29, S-31 and S-35 (formerly S-30) listed in Table VII-C of the MFRP are subject to the monitoring requirements. Since June 1, 1998 at least 2 of the 3 sources have been in continuous operation.

Emissions tests were performed on Engine/Generator #2 (Lean Burn) (S-35) on January 19, 2012 by Blue Sky and by the BAAQMD personnel on 5/31/2012. As in the case of previous testing of these sources by BAAQMD, we are pleased to report that emissions from these sources remain below the new limits imposed by the District on the discharge of regulated air contaminants as listed in the MFRP.

During the reporting period from January 1, 2012 through June 30, 2012 Facility #1403 has experienced no instances of non compliance with any of the applicable regulations, standards or limits as specified in the facility's MFRP.

This document and any attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations. I declare under penalty of perjury under the laws of the state of California that the foregoing is true and accurate.

Sincerely,

Miles Ferns  
DIRECTOR OF UTILITIES
