**EXECUTIVE
OFFICER/APCO**

The purpose of this minor permit revision is to incorporate new casting equipment, remove unused sources from operation, and modify existing boilers which are currently listed in the Title V permit for Tesla Motors.

The District did not receive any comments on the proposed minor revision from EPA, ARB, or the facility.

The District changed the responsible official and the facility contact after the official comment period ended. The District also changed the numbering of A10022, Oxidizer, to A1002. This is a typographical error. Per BAAQMD Regulation 2-6-201, the changes are administrative amendments to the Title V permit and do not require public notice or EPA review.

Please note that the District has also included a Schedule of Compliance for A1002, for non-compliance with the NOx limit in Condition 9158, Part 7.

The final permit can be viewed on the BAAQMD website at [http:// www.baaqmd.gov/Divisions/Engineering/Title-V-Permit-Programs/Title-V-Permits.aspx](http://www.baaqmd.gov/Divisions/Engineering/Title-V-Permit-Programs/Title-V-Permits.aspx). We will also send the permit to you via the Electronic Permit Submittal System. If you have any questions regarding this permit revision, please call Dennis Jang, Senior Air Quality Engineer, at (415) 749-4707.

Sincerely yours,
