This is to advise you that the Bay Area Air Quality Management District is issuing a minor revision to the Major Facility Review Permit for the Rexam Beverage Can Company, Facility Number A1665, pursuant to Application # 11891.

(Chair)

The District proposed a minor permit revision for this facility on April 26, 2006. The purpose of the permit revision is to lower the temperature requirement for the Direct Flame Afterburner A-1. Rexam has demonstrated by approved source testing that the required VOC destruction efficiency for the beverage can coating operations at the facility can be maintained at a lower afterburner temperature.

MARIN COUNTY
Harold C. Brown, Jr.

The lowering of the required incinerator temperature does not qualify as a significant change or relaxation in monitoring, because, as established by source testing, the same demonstration of compliance with the VOC standards (i.e. $\geq 95\%$ control efficiency) is made using either the previous (1450 °F) or new (1375 °F) minimum incinerator temperature.

NAPA COUNTY
Brad Wagenknecht

No comments were received from the EPA or the facility.
