The primary purpose of this revision is to change the permitted capacity of the existing sources, which will allow the facility to accept waste until the fall of 2006; add a new solid waste transfer station source, where waste will continue to be accepted after the fall of 2006 and transported off-site to other disposal sites; and to add the federal requirements to which the facility now becomes subject.

The public comment period ended on August 15, 2006. The EPA comment period ended on August 14, 2006. No comments on this proposed significant revision were received from the public, EPA, or the facility.

The District has decided to issue the revised permit incorporating the proposed significant revision. Enclosed is a copy of the final revised permit. If you have any questions regarding this permit, please call Barry Young, Air Quality Engineering Manager, at: (415) 749-4721.

Sincerely yours,

---
