The purpose of the revision is to correctly represent equipment in the permit, to add updated requirements from 40 CFR 60, Subpart GG, and to incorporate the requirements of the Airborne Toxic Control Measure (ATCM) for Stationary Compression Ignition Engines. In addition, the District has made a number of "Administrative" and "Minor" revisions to the permit to update requirements and standardize the permit.

All revisions are clearly shown in ~~strikeout~~ and underline formatting.

The proposed permit changes constitute a minor revision pursuant to BAAQMD Regulation 2-6-215 and are effective immediately. The permit will be formally re-issued after EPA review. This revision is not subject to public comment and therefore, requires no public notice.
