OFFICER/APCO**

The purpose of this revision is to change the parameter monitoring for the Landfill Gas Fired IC Engines at the facility from exhaust gas temperature to exhaust gas oxygen content as an equivalent means of demonstrating ongoing compliance with NMOC destruction efficiency requirements.

The District has made a preliminary decision to the Significant Revision to the Major Facility Review permit, but the final decision on the permit issuance will consider public and EPA comments on this preliminary decision. The notice inviting written public comments will be published in The Press Democrat. The final date for comments is August 24, 2005.

All permit revisions are clearly shown in ~~strikeout~~ and underline formatting in the proposed permit. Section X of the permit describes the proposed revisions in more detail.

Enclosed for your information is a copy of the proposed permit and the evaluation report/statement of basis. If you have any questions regarding this project, please call Steve A. Hill, Permit Evaluation Manager, at (415) 749-4673, fax (415) 749-5030.

Very truly yours,

Jack P. Broadbent
Executive Officer/Air Pollution Control Officer
