Dear Mr. Broadbent:

This is to advise you that the Bay Area Air Quality Management District is issuing a minor revision to the Major Facility Review Permit for Browning-Ferris Industries of CA, Inc. (Facility Number A2266).

The main purpose of this minor revision is to add a source (S-12 Stockpiles of Green Waste) that was mistakenly omitted from the initial MFR Permit for this site. The permit conditions for this source (Condition # 16315) are being revised to identify the basis, clarify requirements, and add compliance assurance monitoring. In addition, the District is amending this permit to incorporate amendments to the SIP and to District Rules and Regulations, to add new applicable requirements, and to make administrative changes.

The permit was submitted for EPA review on June 17, 2003. EPA submitted no comments on this minor revision.

After this proposed revision was submitted to EPA, the District identified additional SIP amendments: BAAQMD Regulation 8, Rule 5 (11/27/02) was approved into the SIP on June 5, 2003 and BAAQMD Regulation 8, Rule 7 (11/06/02) was approved into the SIP on March 24, 2003. These SIP approvals are reflected in Table IV-B of the final permit.

A copy of the final Major Facility Review Permit and an attachment showing the SIP approval revisions to Table IV-B are enclosed for your information. If you have any questions on this matter, please call **Steve Hill, Air Quality Engineering Manager, at (415) 749-4673.**

Very truly yours,

William C. Norton  
Executive Officer/  
Air Pollution Control Officer
