

December 1, 2003

Ms. Deborah Jordan  
Acting Director, Air Management Division  
**United States Environmental Protection Agency**  
75 Hawthorne Street  
San Francisco, CA 94105

Dear Ms. Jordan:

The requirements for public and EPA review of the following proposed Major Facility Review Permit have been completed:

Facility #	Facility Name	Application #
A2371	USS-POSCO Industries	27726

No comments were received from the facility or the public. EPA's only comment was a recommendation that an enforceable emission limit be added to the permit to assure that the facility does not become a source subject to the MACT standard (40 CFR 63, Subpart CCC, National Emission Standards for Hazardous Air Pollutants for Steel Pickling – HCl Process and Hydrochloric Acid Regeneration Plants). The District has added an annual facility emission limit of 9 tons per year for HCl and has increased source testing and record keeping to ensure that the limit is enforceable.

The District has made a decision to issue the Major Facility Review Permit.

Enclosed for your information are copies of the final permit and the transmittal letter to the facility. If you have any questions regarding this project, please call Steve A. Hill, Acting Director of Engineering Division, at (415) 749-4673.

Sincerely yours,

\_\_\_\_\_  
Jack P. Broadbent  
Executive Officer / APCO
