

May,

Below are the comments on the Draft Title V Permit for the City of Mountain View (A2740) from the City of Mountain View. No other comments were received.

Subject: Draft Title V Permit

Carol:

We reviewed the draft Title V and found all but one of our comments was included this draft for public review. We were hopeful of being able to add to the list of oxygen/temperature well exemptions as necessary. Apparently that is not possible, so we did one last final detailed review of the monthly landfill gas well readings to determine if any other wells should be added to the list. We did find a couple more as noted below:

OXYGEN EXEMPTION

Please ADD to the list for the 544-Acre site the following wells

WA-19
NEA-08
NEE-06

TEMPERATURE EXEMPTION

Please ADD to the list for the 544-Acre site the following well:

NEA-08

WELL IDENTIFICATION NUMBER CORRECTIONS

Please CHANGE one well identification number of the 544-acre site as follows:

From NEA-16 to NEA-16A

Please CHANGE one well identification number found on the Vista site as follows:

From VJ-08 R to VJ-08

We request that the changes noted above be incorporated into the final Title V Permit for the City of Mountain View Landfill.

Thank you very much for continuing help in this matter.

John Welbourn
