The District proposed a minor permit revision for this facility on July 18, 2007. The main purpose of this minor revision was to correct applicable requirements, increase the maximum firing capacity, and clarify other limits for two microturbines (S-12 and S-13). Specifically, the District proposed to remove all federal requirements from Tables IV-C and VII-C, because the microturbines are no longer subject to 40 CFR, Part 60.752(b)(2)(iii)(B) based on EPA's June 2006 determination. The District proposed to increase the maximum permitted firing capacity for each microturbine to 1.6 MM BTU/hour. The District also proposed to remove several unnecessary limits and monitoring requirements and proposed to delete the obsolete custom schedule of compliance. These actions will result in the following emission increases: 0.63 tons/year of PM₁₀, 0.17 tons/year of POC, 0.12 tons/year of SO₂, and 0.02 tons/year of HAPs.

The EPA comment period ended on August 31, 2007. No comments on this proposed minor revision were received from EPA or the facility.

The District has decided to issue the revised permit incorporating the proposed minor revision. The final revised permit can be viewed on the BAAQMD website at http://www.baaqmd.gov/pmt/title_v/public_notices.htm. We will also send a copy of the final permit to you via the Electronic Permit Submittal System. If you have any questions regarding this permit, please call Dennis Jang, Senior Air Quality Engineer, at: (415) 749-4707.

Sincerely yours,

Signed by Jack P. Broadbent
