The District did not receive any comments on the proposed permit from EPA, ARB, or the public. SFPP, L.P. submitted one comment regarding an inconsistency between the vapor storage tank requirements of BAAQMD Regulation 8, Rule 33, section 308 and permit condition 4275. In response, the District modified the hydrocarbon monitor detection range specified in permit condition 4275, part 1.e. to be consistent with the regulation limit of 3000 ppmv.

The District has decided to issue the permit. The final permit can be obtained on the BAAQMD website at <http://www.baaqmd.gov/Divisions/Engineering/Title-V-Permit-Programs/Title-V-Permits.aspx>. We will also send the final permit to you via the Electronic Permit Submittal System. If you have any questions regarding this permit, please call Dennis Jang, Senior Air Quality Engineer, at (415) 749-4707.

Sincerely yours,
