EXECUTIVE OFFICER/APCO

Dear Ms. Jordan:

This is to advise you that the Bay Area Air Quality Management District is issuing a minor revision to the Major Facility Review Permit for Napa-Vallejo Waste Management Authority (Facility # A9183).

Plant	Plant Name	Application	Permit Engineer	City	County
A9183	Napa-Vallejo Waste Management Authority	8677	C. Allen	Napa	Napa

The District proposed a minor permit revision for this facility on March 19, 2004. This revision resulted in no emission increases. The following changes were included in the proposed permit.

- Corrected the collection system description in Table II-A to reflect the current collection system (after the December 2003 modifications).
- Added text to Condition # 12418, Part 3 that describes the approved collection system modifications that the District is issuing an Authority to Construct for.
- Deleted future effective dates that have passed in Tables IV-A and VII-A.
- Added Section X Revision History and revised subsequent section numbers.

The requirements for EPA review of the proposed minor revisions to a Major Facility Review Permit for the facility identified above have been completed. No comments on this proposed minor revision were received from EPA or the facility.

The District has made the following additional administrative revisions to the proposed permit. The specific changes are shown in strikeout and underline format in Attachment 1.

- Updated standard text in Section I.B.1 and Section III.
- Corrected a typographical error in Table VII-A. The correct reference oxygen concentration for the Flare's NOx and CO limits should have been 3% (as identified in Condition # 12418, Parts 9 and 10).

The District has decided to issue the revised permit.

Enclosed is a copy of the final revised permit. If you have any questions regarding this permit, please call Carol Allen, Senior Air Quality Engineer, at (415) 749-4702.

Sincerely yours,

Jack P. Broadbent
Executive Officer / APCO

ATTACHMENT 1

Administrative Amendments to MFR Permit for A9183

May 2004

I. Standard Conditions

...

B. Conditions to Implement Regulation 2, Rule 6, Major Facility Review

1. This Major Facility Review Permit was issued on December 19, 2003, and expires on November 30, 2008. The permit holder shall submit a complete application for renewal of this Major Facility Review Permit no later than May 31, 2008, and no earlier than November 30, 2007. **If a complete application for renewal has not been submitted in accordance with this deadline, the facility may not operate after November 30, 2008.** If the permit renewal has not been issued by November 30, 2008, but a complete application for renewal has been submitted in accordance with the above deadlines, the existing permit will continue in force until the District takes final action on the renewal application. (Regulation 2-6-307, 404.2, 407 & 409.6; MOP Volume II, Part 3, §4.2)

...

III. Generally Applicable Requirements

The permit holder shall comply with all applicable requirements, including those specified in the BAAQMD and SIP rules and regulations and other federal requirements cited below. These requirements apply in a general manner to the facility and/or to sources exempt from the requirement to obtain a District Permit to Operate. The District has determined that these requirements will not be violated under normal, routine operations, and that no additional periodic monitoring or reporting to demonstrate compliance is warranted. In cases where a requirement, in addition to being generally applicable, is also specifically applicable to one or more sources, the requirement and the source are also included in Section IV, Source-Specific Applicable Requirements, of this permit. This section also contains provisions that may apply to temporary sources.

...

VII. APPLICABLE LIMITS & COMPLIANCE MONITORING REQUIREMENTS

Table VII – A
Applicable Limits and Compliance Monitoring Requirements
S-1 AMERICAN CANYON SANITARY LANDFILL
A-2 LANDFILL GAS FLARE

NO _x	BAAQMD Condition # 12418, Part 9	Y		≤ 45 ppmv of NO _x , expressed as NO ₂ , corrected to ±5% O ₂ , dry	BAAQMD Condition # 12418, Part 13d	P/A	Source Test
CO	BAAQMD Condition # 12418, Part 10	Y		≤ 247 ppmv of CO, corrected to ±5% O ₂ , dry	BAAQMD Condition # 12418, Part 13d	P/A	Source Test

X. Revision History

Title V Permit Issuance (Application #2631):

December 19, 2003

Minor Revision (Application #8677):

March 19, 2004

- Corrected the collection system description in Table II-A to reflect the current collection system (after the December 2003 modifications).
- Added text to Condition # 12418, Part 3 that describes the approved collection system modifications that the District is issuing an Authority to Construct for.
- Deleted future effective dates that have passed in Tables IV-A and VII-A.
- Added Section X Revision History and revised subsequent section numbers.

Administrative Amendment (Application #8677):

June 17, 2004

-
- Updated standard text in Section I.B.1 and Section III.
 - Corrected a typographical error in Table VII-A. The correct reference oxygen concentration for the Flare's NO_x and CO limits should have been 3% (as identified in Condition # 12418, Parts 9 and 10).
