**EXECUTIVE  
OFFICER/APCO**

The main purpose of the revision was to modify permit conditions that were approved under NSR application 12918 that was issued on 3/16/06. The permit condition changes included revisions to the maximum rated heat input of the gas turbines, the maximum allowable fuel sulfur content, the ammonia slip monitoring method, source test frequency, and fuel gas analysis frequency.

The EPA comment period ended on August 21, 2007. No comments on the proposed minor revision were received from EPA or ARB. The facility submitted comments that precipitated the following administrative changes to the permit:

- The responsible official in the text was changed from Roger Morales to Eugene Fahey, General Manager and Michael Fees, Operations & Maintenance Manager was added as an alternate responsible official
- A typographical error listed in Section I.B.1 was corrected from October 15, 2010 to September 15, 2010.

The District has decided to issue the permit incorporating the proposed minor revision. The final permit can be viewed and/or downloaded on the BAAQMD website at [http://www.baaqmd.gov/pmt/title\\_v/public\\_notices.htm](http://www.baaqmd.gov/pmt/title_v/public_notices.htm). We will also send the final permit via the Electronic Permit Submittal System. If you have any questions regarding this permit, please call Barry Young, Air Quality Engineering Manager, at: (415) 749-4721.

Sincerely yours,

Signed by Jack P. Broadbent
