The purpose of this amendment is to correct the throughput capacity listed for S-1063 Alkylation Hydrogenator Guard Beds in Table II A of the Title V permit from 20,000 to 22,800 barrels/day.

The 20,000 bbl/day throughput was based upon erroneous data submitted under NSR application 22082 for S-1063. However, at the time application 22082 was submitted, S-1007 Alkylation Unit had already been permitted at a throughput limit of 22,800 bbl/day. Because S-1063 and S-1007 operate in series and have the same capacity, there will be no emission increase associated with this correction.

Administrative amendments do not require EPA review and are effective upon issuance.

The final permit can be viewed on the BAAQMD website at http://www.baaqmd.gov/pmt/title_v/public_notices.htm. We will also send the permit to you via the Electronic Permit Submittal System. If you have any questions regarding this project, please call Dennis Jang, Senior Air Quality Engineer, at (415) 749-4707.

Sincerely yours,
Signed by Jim Karas, P.E.
