No comments were received from the public, the facility or EPA.

In response to staff comments, the following additional correction was made:

- Addition of the following language to Standard Condition I.B.1 to incorporate the application shield in accordance with BAAQMD Regulation 2-6-407:

" If the permit renewal has not been issued by _____, but a complete application for renewal has been submitted in accordance with the above deadlines, the existing permit will continue in force until the District takes final action on the renewal application. (Regulation 2-6-407)"

MARIN COUNTY

NAPA COUNTY

In response to a request from the facility and because the condition was originally instituted at the request of the CEC and the CEC currently has no objections to its removal, the following condition has been deleted from the permit:

38. Sunset Provision: Within three years of CEC Approval, The owner/operator must convert to either a combined cycle or cogeneration plant using BACT in effect at the time of conversion. If conversion does not occur the plant must cease operation. (Basis: California State Resources Code, Section 25552)

SAN MATEO COUNTY

Jerry Hill
Marland Townsend
(Vice-Chairperson)

Pursuant to BAAQMD Regulation 2-6-201, the removal of this permit condition is considered to be an administrative permit amendment since the permit condition is not federally enforceable.

SANTA CLARA COUNTY

Julia Miller

The District has decided to issue the Major Facility Review Permit.
