

Workshops on Draft Emission Rules

Rule 11-18 • Rule 12-16 • Rule 13-1

The Air District invites the Bay Area community to participate in a workshop to learn about three new draft rules:

Regulation 11, Rule 18 aims to reduce potential health risks from toxic air emissions at hundreds of existing Bay Area facilities.

Regulation 12, Rule 16, proposed by a coalition of advocacy organizations, would place a numeric cap on greenhouse gas and other emissions from refineries.

Regulation 13, Rule 1 is the first in a series of regional rules that address greenhouse gases and related pollutants. Rule 13-1 would cap the carbon intensity per barrel of crude oil refined at each Bay Area refinery.

At the workshops, speak with Air District staff, hear a presentation about the draft rules, ask questions and offer comments. You can also learn about the Air District's Draft 2017 Clean Air Plan, *Spare the Air, Cool the Climate* by visiting an interactive display.

Comment deadlines for each rule will be announced when draft rule language becomes available on the Regulatory Workshops page on the Air District website: <http://www.baaqmd.gov/rules-and-compliance/ruleddevelopment/regulatory-workshops>. For questions and written comments, contact Greg Nudd at gnudd@baaqmd.gov.

Language interpretation can be provided upon request at least 72 hours before an event. Contact Azibuike Akaba at aakaba@baaqmd.gov or 415-749-8603 to request interpretation.

WORKSHOP SCHEDULE

Cupertino

Mon., March 27, 4:30-6 p.m.
Cupertino Community Hall
10350 Torre Ave.
