Hello Mr. Finkle:

We would like the following comments added to the record re: the Air District Regulation 2 revisions underway. To protect public health in Bay area communities -

1. Delete particulate matter (PM) from allowed "emissions trading";
2. Lock in regulation of greenhouse gas emissions strategies by a) restricting emissions with high global warming potential (e.g., methane), and b) creating a no net increase strategy for GHGs;
3. Lower PM10 and PM 2.5 major mod thresholds to 10 lb/d from 15 and 10 tpy, respectively;
4. Include PM in the toxics risk analysis for a proposed project

Thank you for including these comments.

Sincerely,  
W. Ellen Sweet
