Subject: Please vote in favor of a strong Rule 6-5 at the Bay Area Air District on July 21, requiring wet gas scrubbers

[REDACTED]

Dear Ms. Hiratzka,

By obstructing requirements for commonly used wet gas scrubbers in local oil refineries, Chevron and PBF have contributed to illness and premature deaths in the North and East Bay for decades. It is high time for their refineries in Richmond and Martinez to reduce dramatically the amount of fine particulate matter (PM2.5) that they emit. I hope the Air District Board will embrace this opportunity to protect Bay Area communities from those companies' damaging and irresponsible attacks on our health and well-being.

Sincerely, David E. Payne
