ESH-EFA-AQ-21-21152

Dear Ms. Elwell,

Thank you Bay Area Air Quality Management District (BAAQMD) for preparing the public workshop to discuss the proposed amendments to Regulation 9, Rule 6, Nitrogen Oxides Emissions from Natural Gas-Fired Boilers and Water Heaters (Rule 9-6) on October 7, 2021.

Lawrence Livermore National Laboratory (LLNL) has some comments on the proposed amendments to Rule 9-6, mainly associated with the LLNL's electrical infrastructure could not be able to handle the additional demand of all new electric boilers and water heaters, and the related infrastructure upgrade costs. LLNL is in the process of formulating our comments and will provide our formal written comments to BAAQMD within a few days. Thank you in advance for your consideration. Meanwhile, should you have any questions or would like to discuss our comments in more detail, please do not hesitate to contact me.

Respectfully submitted,

Wai-Man So
