Legislative Officer
This bill will ensure the public health and safety of all students and school employees in California by requiring that private schools and charter schools meet the same siting requirements as public schools.

**Update:** This bill was heard on May 14, 2020, by the Assembly Environmental Safety and Toxic Materials (Ayes: 7 / Noes: 0). Referred to Assembly Appropriations.
Toxic Air Contaminants
Introduced by Assembly Members Bauer-Kahan and Bonta
February 21, 2020

This bill will allow air districts to adopt local rules related to toxic air contaminants at indirect sources of air pollution, such as warehouses and distribution centers. This bill also allows collection of data that will help air districts work with these sources and communities to reduce health impacts.

Update: The bill had been double-referred to Assembly Natural Resources and Transportation Committees, but unfortunately was not prioritized for a hearing due to COVID-19.
