BEFORE THE HEARING BOARD
OF THE
BAY AREA AIR QUALITY MANAGEMENT DISTRICT
STATE OF CALIFORNIA

In the Matter of the Application of

SAN JOSE / SANTA CLARA WATER POLLUTION CONTROL PLANT

For a Variance from Regulation 9, Rule 1, Section 302, and Permit Condition 17741.

No. 3648

ORDER GRANTING EMERGENCY VARIANCE

The above-entitled matter, being an Application for Variance from the provisions of Regulation 9, Rule 1, Section 302, and Permit Condition 17741, having been filed on March 20, 2013, at 2:21 p.m., and having been considered by the Hearing Board,

THE HEARING BOARD STATES as the reasons for its decision and FINDS as to those matters in which findings are required:

A. Applicant filed this Application for Variance under the Emergency Variance (EV) procedures, Hearing Board Rules, Section 2.5. Pursuant to Health and Safety Code Sections 42359 and 42359.5, the Hearing Board determined that this Application properly could be ruled upon without notice and hearing. Prior to making this determination, and in accordance with Hearing Board Rules Section 2.5.d.2, the Hearing Board requested and received a response to this Application from the Executive Officer/Air Pollution Control Officer (APCO) for the Bay Area

ORDER GRANTING EMERGENCY VARIANCE
Air Quality Management District (Air District). The response recommended the EV be granted.

B. Applicant operates a waste water treatment plant at 700 Los Esteros Road, San Jose, CA 95134.

C. A ferric chloride dosing tank began leaking, as discovered by a Plant Area Shift Supervisor, resulting in a release of ferric chloride used to suppress hydrogen sulfide (H2S) in the digester gas, resulting in an excess in H2S in the digester gas.

D. Applicant has determined that the tank must be replaced and has begun the installation process but must work to comply with the Certified Unified Program Agency permitting requirements relative to the new tank placement. Applicant has requested a variance period of March 20, 2013, at 5:00 p.m., to April 20, 2013, at 5:00 p.m. (32 days).

E. Applicant estimates there will not be excess emissions during the repair period.

F. Applicant cannot curtail, terminate or modify operations in lieu of obtaining a variance because wastewater treatment operations are constantly running.

G. Applicant intends to reduce excess emissions during the variance period by exploring the possibility of dosing upstream of the plant in the collection system, if permissible and effective.

H. Therefore, the Applicant does meet the good cause standard for issuance of an EV.

THEREFORE, THE HEARING BOARD ORDERS:

An Emergency Variance from Regulation 9, Rule 1, Section 302 and Permit Condition 17741, be and is hereby granted.

DATED: May 16, 2013
