## **Air District issues fourth consecutive Spare the Air smog alert**

*Extreme heat, light winds expected to trigger unhealthy air quality*

**SAN FRANCISCO** – Today, the Bay Area Air Quality Management District is issuing its thirteenth *Spare the Air Alert* for smog in 2017.

**Air quality is forecast to be unhealthy again tomorrow, Sunday, September 3.** A high-pressure ridge is over the region, leading to extremely hot, triple-digit temperatures inland and light, offshore winds. These conditions, coupled with smoke from Northern California and Oregon wildfires, are expected to cause unhealthy ozone levels in the East and South Bay areas. **The Air District has also issued a smoke advisory for the Labor Day weekend. There is no free transit tomorrow and there is no wood burning ban in place.**

“Another day of extreme heat and wildfire smoke in the Bay Area have caused unhealthy air quality throughout the region,” said Jack Broadbent, executive officer of the Air District. “It’s important for Bay Area residents, especially children, the elderly and those with respiratory conditions, to take precautions to protect their health.”

Bay Area residents impacted by the heat should follow the advice of local health officials to find cooling centers in their area.

*Spare the Air Alerts* are called when ozone pollution is forecast to reach unhealthy levels. Ozone, or smog, can cause throat irritation, congestion, chest pain, trigger asthma, inflame the lining of the lungs and worsen bronchitis and emphysema. Long-term exposure to ozone can reduce lung function. Ozone pollution is particularly harmful for young children, seniors and those with respiratory and heart conditions.

When a *Spare the Air Alert* is called, outdoor exercise should be done only in the early morning hours when ozone concentrations are lower. Residents are encouraged to reduce air pollution every day by rethinking their commute and avoiding driving alone.

Find out more about what the Air District is doing to address climate change in the nine-county Bay Area. *Spare the Air-Cool the Climate* is a blueprint for tackling regional air pollution and climate pollutants while improving the health of Bay Area residents for the next several decades.
