Air District issues Spare the Air Smog Alert

Commuters urged to find alternatives to driving alone

SAN FRANCISCO – Today, the Bay Area Air Quality Management District is issuing its fourth Spare the Air Alert for smog in 2017.

Air quality is forecast to be unhealthy tomorrow, Thursday, June 22. High pressure over Northern California is expected to produce triple-digit temperatures inland. Light winds and hot temperatures throughout the day are expected to cause unhealthy ozone levels in the South and East Bay regions. **There is no free transit tomorrow and there is no wood burning ban in place.**

“More extreme temperatures from climate change and the resulting air quality issues are a reminder of the changes we can all make to reduce our carbon footprint and improve the air we breathe,” said Jack Broadbent, executive officer of the Air District. “In the Bay Area, one of the best things we can do to reduce air pollution and greenhouse gases is to drive less.”

Spare the Air Alerts are called when ozone pollution is forecast to reach unhealthy levels. Ozone, or smog, can cause throat irritation, congestion, chest pain, trigger asthma, inflame the lining of the lungs and worsen bronchitis and emphysema. Long-term exposure to ozone can reduce lung function. Ozone pollution is particularly harmful for young children, seniors and those with respiratory and heart conditions.

When a *Spare the Air Alert* is called, outdoor exercise should be done only in the early morning hours when ozone concentrations are lower. Residents are encouraged to reduce air pollution every day by rethinking their commute and avoiding driving alone.

Find out more about what the Air District is doing to address climate change in the nine-county Bay Area. *Spare the Air-Cool the Climate* is a blueprint for tackling regional air pollution and climate pollutants while improving the health of Bay Area residents for the next several decades.
