Open burning season for double crop stubble ends; seasons for fall marsh management and stubble and straw begin

SAN FRANCISCO - The Bay Area Air Quality Management District is announcing that the permissible burn season for double crop stubble within the Bay Area closes on Friday, August 31. Permissible burn seasons for fall marsh management and for stubble and straw will begin Saturday, September 1.

Under Air District policy, permissive burn days will not be declared when a Spare the Air Alert is in effect or if the region is experiencing significant smoke impacts from wildfires.

The fall open burning season for marsh management fires runs from September 1 through October 15. Marsh management fires are set for the purpose of improving lowland and marsh areas for wildlife and game habitat and must be deemed necessary by the California Department of Fish and Wildlife. Such fires are only allowed once in any two-year period on a given piece of land, and no more than 100 acres of any property may be burned in a single day. All materials to be burned are subject to burn acreage limitations. Marsh management fires are not allowed before 10 a.m. or after 3 p.m., nor can any additional material be added to existing fires after 3 p.m.

The open burning season for agricultural fires set to dispose of stubble and straw begins September 1 and runs through December 31. These fires must be deemed necessary and must be set or allowed by the local public fire official. All straw and vegetation to be burned must be dry and fires are subject to burn acreage limitations.

Prospective burners should also check with their local fire agencies and CAL FIRE for local permitting and fire safety requirements. CAL FIRE units may have additional restrictions in place, so please contact the [local CAL FIRE station](#) in your community.

Open burning is regulated because of its impact on air quality. Certain fires for agricultural purposes, flood control, fire training and the prevention of fire hazards, among other purposes, are allowed when weather conditions are favorable for smoke dispersion, many of them during specified periods throughout the year. Each day of the year is designated as either a BURN or a NO BURN day and permissible fires can only be set during their established burn season on a designated BURN day.

Open burning requirements apply to the nine-county Bay Area region, including Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, southwestern Solano and southern Sonoma counties.
