Air District issues Spare the Air Alert for Thursday

Rising temperatures and vehicle exhaust to create smoggy conditions

SAN FRANCISCO – The Bay Area Air Quality Management District is issuing the thirteenth Spare the Air Alert for smog for Thursday, September 12, 2019.

Air quality is forecast to be unhealthy **tomorrow, Thursday, September 12**. A high-pressure system is moving into the Bay Area, causing light winds and high temperatures inland. In combination with motor vehicle exhaust, these conditions will lead to elevated concentrations of ozone, or smog.

“Another period of hot weather is a reminder that we need to reduce our daily driving to reduce air pollution,” said Jack Broadbent, executive officer of the Air District. “Sharing rides, taking transit, biking and walking can help make the air cleaner and healthier in the Bay Area.”

Spare the Air Alerts are issued when ozone pollution is forecast to reach unhealthy levels. Ozone can cause throat irritation, congestion, chest pain, trigger asthma, inflame the lining of the lungs and worsen bronchitis and emphysema. Long-term exposure to ozone can reduce lung function. Ozone pollution is particularly harmful for young children, seniors and those with respiratory and heart conditions. When a Spare the Air Alert is issued, outdoor exercise should be done only in the early morning hours when ozone concentrations are lower.

Find out more about what the Air District is doing to address climate change in the nine-county Bay Area. Spare the Air — Cool the Climate is a blueprint for tackling regional air pollution and climate pollutants while improving the health of Bay Area residents for the next several decades.
