# **Air District extends Spare the Air Alert through Sunday**

*Wildfire smoke causing unhealthy air quality*

**SAN FRANCISCO** – The Bay Area Air Quality Management District is extending a Spare the Air Alert for wildfire smoke through Sunday, August 23, which bans burning wood, manufactured fire logs or any other solid fuel, both indoors and outdoors.

Wildfire smoke from numerous fires inside and outside of the Bay Area is causing elevated levels of particulate pollution. Air quality is expected to be unhealthy with the heaviest impacts along the Peninsula, Santa Clara Valley and Livermore Valley, although smoke impacts are possible throughout the region. It is illegal for Bay Area residents and businesses to use their fireplaces, wood stoves, pellet stoves, outdoor fire pits or any other wood-burning devices during a Spare the Air Alert for particulate pollution.

“Unfortunately, wildfires continue to burn throughout the Bay Area and we expect several days of smoky conditions, said Jack Broadbent, executive officer of the Air District. “As respiratory health is top of mind for all of us during the pandemic, it’s crucial that residents take steps to avoid exposure to unhealthy air.”

Spare the Air Alerts are issued when ozone or particulate matter pollution is forecast to reach unhealthy levels. If the smell of smoke is present or visible, it is important that Bay Area residents protect their health by avoiding exposure. If possible, stay inside with windows and doors closed until smoke levels subside. If temperatures are too hot indoors, visit an air-cooling center or other building that provides filtered air. It is also recommended that Bay Area residents set air conditioning units and car vent systems to re-circulate to prevent outside air from moving inside.

Smoke can irritate the eyes and airways, causing coughing, a dry scratchy throat and irritated sinuses. Elevated particulate matter in the air can trigger wheezing in those who suffer from asthma, emphysema or COPD. Elderly persons, children and individuals with respiratory illnesses are particularly susceptible to elevated air pollution levels and should take extra precautions to avoid exposure.

To find out when a Spare the Air Alert is in effect, residents can sign up for text alerts by texting the word “START” to 817-57, register for email AirAlerts at [www.sparetheair.org](http://www.sparetheair.org), call 1(800) HELP-AIR, download the Spare the Air App or connect with Spare the Air on Facebook or Twitter.
