# Air District extends Spare the Air Alert through Friday

*Wildfire smoke continues to cause unhealthy air quality*

**SAN FRANCISCO** – The Bay Area Air Quality Management District is extending a Spare the Air Alert for wildfire smoke through Friday, August 28, which bans burning wood, manufactured fire logs or any other solid fuel, both indoors and outdoors.

Wildfire smoke from numerous fires inside and outside of the Bay Area is continuing to cause elevated levels of smoke pollution. Although wind patterns and weather conditions may fluctuate over the next few days, air quality is expected to be unhealthy in many regions of the Bay Area. It is illegal for Bay Area residents and businesses to use their fireplaces, wood stoves, pellet stoves, outdoor fire pits or any other wood-burning devices during a Spare the Air Alert for particulate pollution.

“The air quality impacts of these wildfires burning throughout Northern California are a testimony to the ongoing harmful impacts of climate change,” said Jack Broadbent, executive officer of the Air District. “It’s important for us all to continue to be vigilant and stay indoors as smoke continues to impact the region.”

Spare the Air Alerts are issued when ozone or particulate matter pollution is forecast to reach unhealthy levels. If the smell of smoke is present or visible, it is important that Bay Area residents protect their health by avoiding exposure. If possible, stay inside with windows and doors closed until smoke levels subside. If temperatures are too hot indoors, visit an air-cooling center or other building that provides filtered air. It is also recommended that Bay Area residents set air conditioning units and car vent systems to re-circulate to prevent outside air from moving inside.

Smoke can irritate the eyes and airways, causing coughing, a dry scratchy throat and irritated sinuses. Elevated particulate matter in the air can trigger wheezing in those who suffer from asthma, emphysema or COPD. Elderly persons, children and individuals with respiratory illnesses are particularly susceptible to elevated air pollution levels and should take extra precautions to avoid exposure.

To find out when a Spare the Air Alert is in effect, residents can sign up for text alerts by texting the word “START” to 817-57, register for email AirAlerts at [www.sparetheair.org](http://www.sparetheair.org), call 1(800) HELP-AIR, download the Spare the Air App or connect with Spare the Air on Facebook or Twitter.
