Air District extends Spare the Air Alert through Thursday
Bay Area breaks record for consecutive Spare the Air Alerts

SAN FRANCISCO – The Bay Area Air Quality Management District is extending a Spare the Air Alert for wildfire smoke through Thursday, September 3, which bans burning wood, manufactured fire logs or any other solid fuel, both indoors and outdoors. This is the longest stretch of consecutive Spare the Air Alerts ever in the Bay Area.

Wildfire smoke from the numerous fires inside and outside the Bay Area will continue to cause elevated levels of smoke pollution this week. Smoke from fires in Santa Cruz and Marin Counties, as well as other large fires in northern California, are expected to create unhealthy concentrations of fine particulate pollution throughout the region. It is illegal for Bay Area residents and businesses to use their fireplaces, wood stoves, pellet stoves, outdoor fire pits or any other wood-burning devices during a Spare the Air Alert for particulate pollution.

“As smoky conditions continue to impact the Bay Area this week, we will have a record-breaking number of consecutive Spare the Air Alerts and certainly some accompanying ‘smoke fatigue,’” said Jack Broadbent, executive officer of the Air District. “As long as these conditions persist, it’s critical for Bay Area residents to closely monitor local air quality conditions and take precautions, such as staying indoors, to reduce smoke exposure.”

Spare the Air Alerts are issued when ozone or particulate matter pollution is forecast to reach unhealthy levels. If the smell of smoke is present or visible, it is important that Bay Area residents protect their health by avoiding exposure. If possible, stay inside with windows and doors closed until smoke levels subside. If temperatures are too hot indoors, visit an air-cooling center or other building that provides filtered air. It is also recommended that Bay Area residents set air conditioning units and car vent systems to re-circulate to prevent outside air from moving inside.

Smoke can irritate the eyes and airways, causing coughing, a dry scratchy throat and irritated sinuses. Elevated particulate matter in the air can trigger wheezing in those who suffer from asthma, emphysema or COPD. Elderly persons, children and individuals with respiratory illnesses are particularly susceptible to elevated air pollution levels and should take extra precautions to avoid exposure.

To find out when a Spare the Air Alert is in effect, residents can sign up for text alerts by texting the word “START” to 817-57, register for email AirAlerts at www.sparetheair.org, call 1(800) HELP-AIR, download the Spare the Air App or connect with Spare the Air on Facebook or Twitter.
